Edition 2009 Dubai

Editorial

In contrast to the major trends of the cosmetic and wellness industry, we have specialized in "classic" skin care and well-being. Our products are developed and produced under our supervision on our own premises.

Meanwhile I have become a "wise old owl" and still find a lot of joy in nature's treasures and their impact on physical and mental well-being.

Caressing the soul by touching it, leads to a foretaste of paradise.

It gives me joy if you indulge and feel inner peace

Yours,

Lothar Engel

Essential and fragrant bath oils

Pleasant relaxing baths are balm for body and soul. The scents of blossoms, fruits or herbs in essential oils pamper the senses when taking a bath. They are inhaled through the nose and absorbed by the skin and, thereby, have a positive effect on the body and the soul. The scents of medesign's bath oils are relaxing, harmonizing, stimulating or activating and add to the enjoyment of a balanced, relaxed life.

Bath oils with their lipid regulating effect balance the skin's lipid content and are, therefore, an ideal treat for the skin. medesign's bath oils do not contain any preservatives or artificial colours. The content of one bottle is sufficient for 10 full baths.

Gentle and long-lasting hair removal

Not many women are blessed with smooth skin, free of hair. For those who are not, modern aesthetic cosmetics offer numerous possibilities for hair removal, however, only a few of these methods are easy, mild and safe for delicate skin as well as absolutely painless. medesign offers a range of hair removal products which are gentle, long-lasting and also suitable for delicate skin. Only the best for your beauty.

Softmed Hair Removal Lotion

medesign's Softmed hair removal lotion is ideal for every woman. It gently removes any unwanted body hair efficiently, quickly and painlessly. It can be used for face, armpits, chest, legs, bikini zone and even the intimate area. Softmed works mildly and safely on even the most delicate skin types. Hair is removed just below the skin and regrowth is softer and takes much longer than with shaving. Additionally, the substances chosen for Softmed cleanse the skin and have a gentle peeling effect. After hair removal we recommend nourishing the skin with pure jojoba oil for long-lasting beautiful soft skin. Softmed may also be used for hair removal prior to surgery.

Natural skin care on the basis of 100 % natural jojoba oil

Our skin has to deal with a lot of exposure every day. Special care is necessary to keep skin healthy and soft. Natural jojoba oil is the ideal everyday care for all skin types. It provides the skin with important nutrients and can even be used on delicate skin. Jojoba oil, which is the basis of all high quality oils by medesign, is the liquid wax extracted from the seed of the jojoba shrub native to the southern USA. Traditionally it was used by many native tribes in the deserts for healing and for skin- as well as hair care.

Jojoba oil by medesign is made from high quality, first press ingredients and contains many important nutrients such as vitamin E, which is essential for healthy skin. Jojoba oil is the ideal daily care for the face and the body - especially also for sensitive skin - and provides pleasant softness and elasticity. The natural highest quality oils by medesign are absorbed well, balance oil production and are long-lasting. The range of medesign products contains a variety of scents and effects - a product for every occasion or taste. For personal well-being - only the best care by medesign.

100 % Natural Jojoba Oil

Gently nourishes the face and body and provides the skin with pleasant elasticity. The thin natural oil spreads and absorbs well, balances oil production and is long-lasting. Especially after hair removal jojoba oil soothes and maintains the soft feeling of velvety skin.

Select natural oils for individual skin care

Everybody's skin is different – and it differs from time to time. Skin adapts to summer and winter, rest or stress situations. Nature provides help for many problems. The oily press of different fruits, nuts or seeds has been of great importance for hair- and skin care since time immemorial. Rediscovered and carefully processed select seed essences can be found in medesign's exclusive oils. What makes these oils so precious is their rarity. As an example: 100 kilograms of argan fruit can only make the small amount of 2 litres of oil. Your skin is worth the effort – simply the best by medesign.

Burr Root Oil

Burr root oil has a regulating effect on dry and oily hair, strengthens it and provides hair with a beautiful shimmer. Furthermore, burr root oil can be used as a care product for skin problems such as oily or impure skin as well as acne.

Ingredients: Jojoba Oil, first pressing – Buxus Chinensis, Klettenwurzel Extract – Arctium Lappa Root Extract

Special care products for the delicate intimate area

Care is good, excessive hygiene on the other hand is rather detrimental. Alkaline soaps destroy the skin's natural acid mantle. Common body care products are especially not suitable for the intimate area. The reason for this is that the pH-value of the intimate area differs to that of the rest of the body's skin. Furthermore, there are numerous useful bacteria to be found in the vagina. Especially the lacto bacillus (lactic acid) provides the vagina with a balanced, healthy, acidic environment – an important protection against bacteria and fungus. If the mucous membranes of the vagina become alkaline, problems can arise. Itching, burning or even pain are the vagina's cry for help, which you should react to. A healthy vaginal flora also protects the uterus, the fallopian tubes and the ovaries. Infections of the womb area are often caused by rising infections of the vagina. Female intimate care requires suitable wash and care products. Femsoft by medesign offers a product line ranging from washes to care products for daily use.

Femsoft Intimate Wash

Femsoft Intimate Wash is ideal for the daily care of the female intimate area. Daily washing of the genital area with water and Femsoft Intimate Wash maintains the pH-value and, thereby, keeps the entire intimate area in natural balance. This wash lotion is 100 % natural and does not contain any additives, which makes it suitable for use during pregnancy.

Ingredients: Aqua, Coco Glycoside, Citic Acid, Hellantus Annus, Xantham gum, Chlorella Fermentation Extract, Urtica Dioica, Hydrolysed Wheat Protein, Lactis Proteinum, Glycerin and Essential Oils.

Time out for the senses – warmth from outside for the inside

Stress, rush, noise – unpleasant things are what we have to deal with every day. Unfortunately we cannot close our ears like we can close our eyes, they are always aware – conscious or unconscious. Sometimes the fine ear canals let us know that the ears are "blocked" or give us a clear sign with a sound that will not go away.

Ear candles are an old medical tradition and were used by the Steppe tribes in Siberia and in Asia as well as by the American Indians. Today ear candles are used as a wellness treat or as a therapeutic method for treating e.g. ear problems.

Beeswax Ear Candles

The burning ear candle gently warms the ear. Vibration creates a gentle massage of the eardrum and the eustachian tube and leads to stress relief. The soft crackling of the ear candle and the scent of beeswax soothe and relax.

Medesign ear candles are handmade with care according to an old formula and made out of the best, regularly certified raw materials. Slight differences in colour and length are signs of hand-made quality.

Heating pads – nature's goodwill

Each different in its shape, density and effect. Cherry stones, rapeseeds, grapeseeds ... nature offers a variety of natural materials which have pleasant effects. As the content of heating pads, they are a "dry hot water bottle". The seeds evenly radiate stored warmth for a long period of time and do good. Their special structure and adaptability allow them to nestle against the body and take some of the strain off, support, help the muscles relax and activate blood circulation. The grainy adaptability, furthermore, provides a very pleasurable massage helpful to ease wind in babies and children. The naturally filled pillows may also be used as a cooling pad e.g. for swelling or headaches. When compared to ice packs they are not as cold and don't melt. Furthermore they maintain their cooling effect over a longer period of time.

medesign heating pad-fillings contain select natural materials which are thoroughly cleaned and hand Packed available in various styles. Warm up!
– with medesign's heating pads, of course.

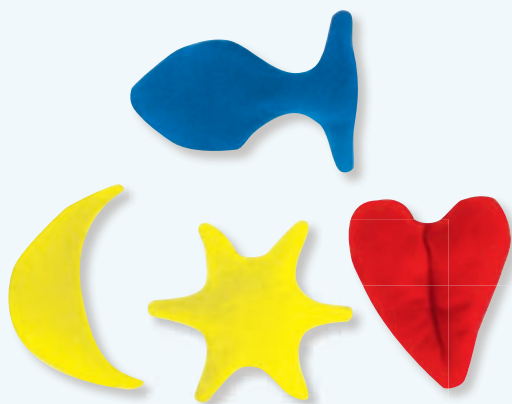

Cherry Pit Pillow Red

medesign's Cherry Pit Pillow is a traditional household remedy which has the same effects as a hot-water bottle. Cherry Pit Pillows are a wonderful heat accumulator and over and above this have another very pleasant benefit: They can be used perfectly as a massage pillow, e.g. for pregnant women, for a hand or foot massage or for a massage of the back and the shoulders. They are also used to ease babies' or children's stomach aches and wind.

Furthermore medesign's Cherry Pit Pillow can also be used as a cooling pad.

Scar care – first aid for your skin

Our skin is our hull: it protects, breathes, renews itself and reacts to internal and external influences. Sometimes with irritations, pimples or rashes. The reasons are often unknown – fabric or substance intolerance, also stress or psychological strain can lead to reactions of the skin. Whether it is an irritation or an injury – every disorder of the tissue leaves traces because our skin is like the bark of a tree. Notches, growths or indentations are the visible and mostly unwanted reminders.

Scars are marks of life – small or large. They are more or less visible and can often be felt. The skin structure of scars is extremely delicate and needs special care. The way skin tissue grows together after injuries differs but special treatment and daily care with unique massage oils can positively influence scarring.

Tend your healing skin with nature's best essences. medesign offers a range of special products which – when used regularly and early enough – can prevent unwanted scarring or positively influence existing marks.

Scar Oil for Scar Massage

medesign's Scar Oil is a natural skin care product used for the regeneration of old and new hypertrophic scars and keloids. The ingredients are 100 % natural and nourish injured skin by calming and smoothing the affected areas. It can be used all over the body, especially on the genital area, after a tear or cut of the perineum.

Ingredients: Buxus chinensis, hypericum perforatum, triticum vulgare, rosa damascena, salvia sclarea

Scarmed Silicone Scar Pads

Modern scar treatment starts directly after the healing of the wound. The Scarmed Silicone Scar Pads by medesign are especially recommended for new scars. After the wound has completely healed, the accurately fitting silicone pads are placed on the new scar to protect the new tissue and make it easier for the skin to heal. The see-through pads are gentle and soft to the skin, adjust to movement and offer high wearing comfort.
